• **Cross Contact** - All fried ingredients are cooked in shared fryers and maybe exposed to all allergens/animal products. For this reason, guests with food allergies should avoid fried items.

• **Vegetarian (VT)/Vegan (VG)** - Our corporate dietitian has identified which menu items meet our vegetarian and vegan standards. **Vegetarian (VT)** items contain no beef, pork, poultry, fish, shellfish or ingredients derived from animals (e.g., gelatin, chicken broth, animal rennet), but items may contain eggs or milk. Cheeses processed with microbial enzymes (not rennet) are marked as vegetarian.

**Vegan (VG)** items contain no animal-derived products. Because we use shared fryers in our restaurants, fried foods are exposed to animal product during the cooking process (e.g., French Fries cooked in same oil as Chicken Crispers).

**Allergen Information** - The health and safety of our guests are always top priorities. As part of this ongoing commitment, we provide the most current allergen menu information available from our food suppliers on the eight most common allergens including egg, fish, milk, peanut, shellfish, soy, tree-nuts, and wheat/gluten. Every effort is made to keep this information current. However, it is possible that ingredient changes and substitutions may occur due to the differences in regional suppliers, recipe revisions, preparation techniques, and/or the season of the year. Certain menu items may vary from restaurant to restaurant and may not be available at all locations. Limited time offers, test products, or regional items have not been included on these menus. During normal kitchen operations involving shared cooking and preparation areas, the possibility exists for food items to come in contact with other food products. For example, fried items are identified with an "•" under the cross-contact column of the guide because of the use of shared fryers between foods. For this reason we advise guests with food allergies to avoid all fried foods.
